

Please put Only Rain Down the Drain!

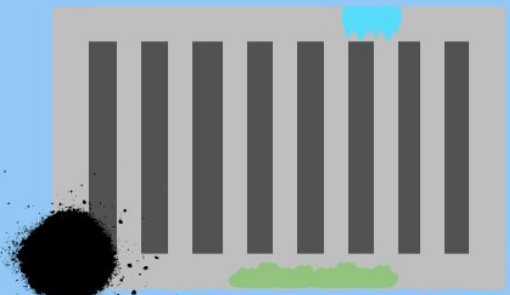

Outdoor storm & road drains don't filter what we put into them. They run directly into streams and the sea. Pouring oils, chemicals and waste water down these drains can pollute water, harm wildlife and cause poor water quality for beach users.

To help keep them clean, follow these steps.

Always pour cleaning waste water that contains soap, bleach, or disinfectants down an indoor waste drain.

Avoid pouring chemicals, cleaning products, oil or any other substances down storm or road drains.

If you see pollution report it immediately on
0800 807060
